

i3SYNC & i3SYNC Touch

World's first unique wireless touch solution.

A close-up photograph of a person's hands holding a small, black, rectangular device. The person is wearing a light blue long-sleeved shirt. The device is being held next to the edge of a large, white, modern monitor. The background is a blurred office setting with a grey wall and some green and blue elements.

CHANGE THE WAY YOU GIVE PRESENTATIONS

Discover a new way to give presentations with this compact and lightweight presenting tool. The i3SYNC is userfriendly and enables different participants to share content on a central screen with the push of a button. The tool is compatible with all technology devices that have a HDMI connection. You only need to plug in the wireless transmitter and receiver and you are ready for instant sharing.

i3SYNC & i3SYNC TOUCH

Messy cables, adjustments of resolutions or trouble with configurations are all problems of the past. i3SYNC is a user-friendly tool that allows all meeting participants to share content from any HDMI compatible device on a central screen.

INTERACTIVE • INTEGRATED • INSPIRING

i3-Technologies is a global company. Every day we gain new impressions about the accelerators behind the shift that is happening in learning and meeting environments. This shift influences the way we at i3-Technologies think about furniture and technology. And ultimately it drives change and innovation in our designs and the way we envision our interactive, integrated and inspiring solutions.

In our hyper-connected world, it is only logical that meetings are increasingly taking place on a global level. As a consequence, traditional meetings need to be transformed into a global hub for interaction and connectivity, in which both cyberspace, computing devices, and traditional and digital meeting tools blend perfectly to enable the optimal interaction experience.

When crafting tools and products, or delivering know-how to the customer, i3-Technologies integrates 3 principles as the fundament to enable the optimal meeting and learning environment: interactivity, integration and inspiration. Above this, we cherish 3 design principles to ensure maximal satisfaction of the customer and minimal impact on the environment: User-based Design, Universal Design for Learning and Cradle-to-Cradle.

At i3-Technologies we aim to stay in touch with our customers' expectations and objectives by offering fully integrated technology solutions for any learning or meeting environment. We strive for a clear communication between people and a smooth synergy with the i3 products.
