# EVOKO

Evoko Pusco

Solution overview

# The easy way out for public space communication

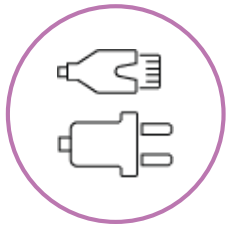

Pusco Wall

Pusco Floor

# Evoko Pusco is a complete, all-in-one system made to improve public space communication

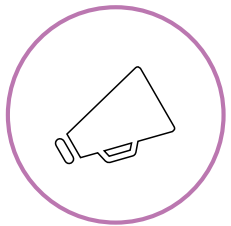

All aspects of public space communication have been merged into one simple and smart solution. Start focusing on the information you want to share, not technical aspects of how to do it

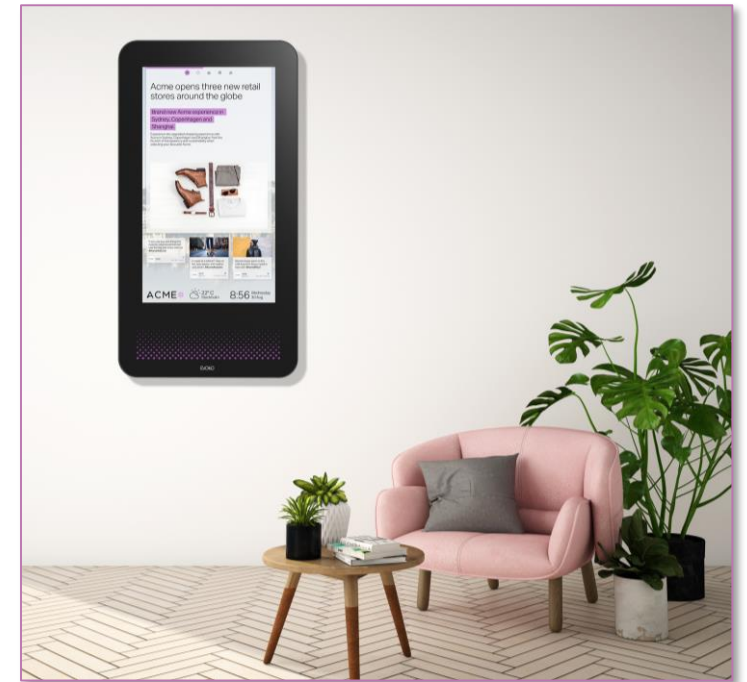

PLUG-IN

PREPARE

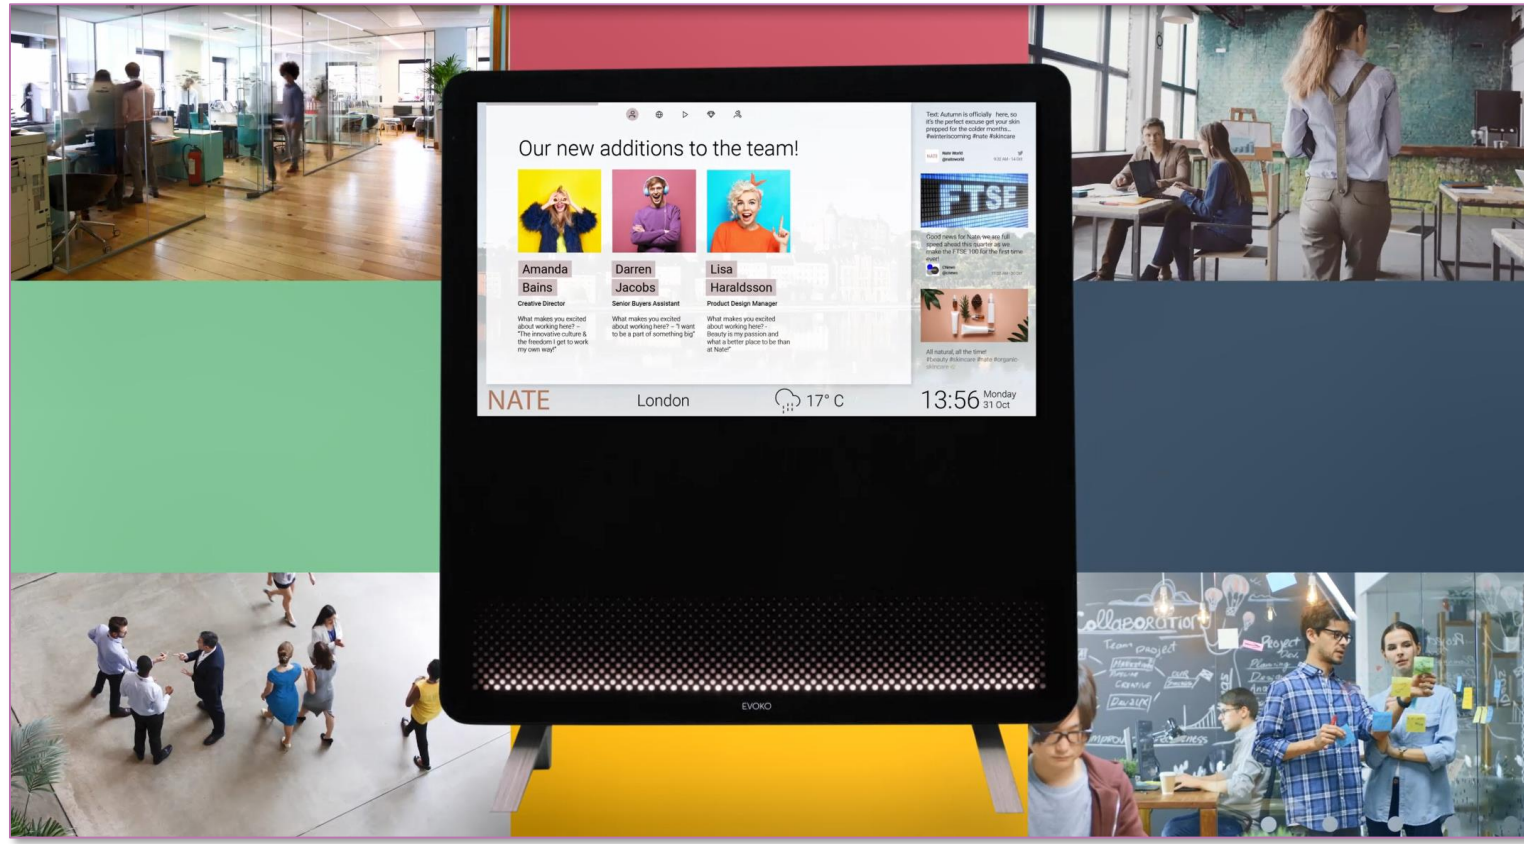

REACH OUT

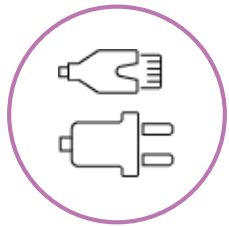

# We have done all the heavy work for you!

Forget tricky installations and selecting components, or having to worry about the design or how it will look

# Plug in ethernet- and power cables and you are ready to go!

To avoid all the hazel when setting up a unit, we have limited it down to two actions

## PLUG-IN

## PREPARE

## REACH OUT

# Pre-made templates to guarantee your message looks good

Share company news, inform about today's visitors, a blog post, welcome new hires, display a website, play a video or celebrate employee birthdays

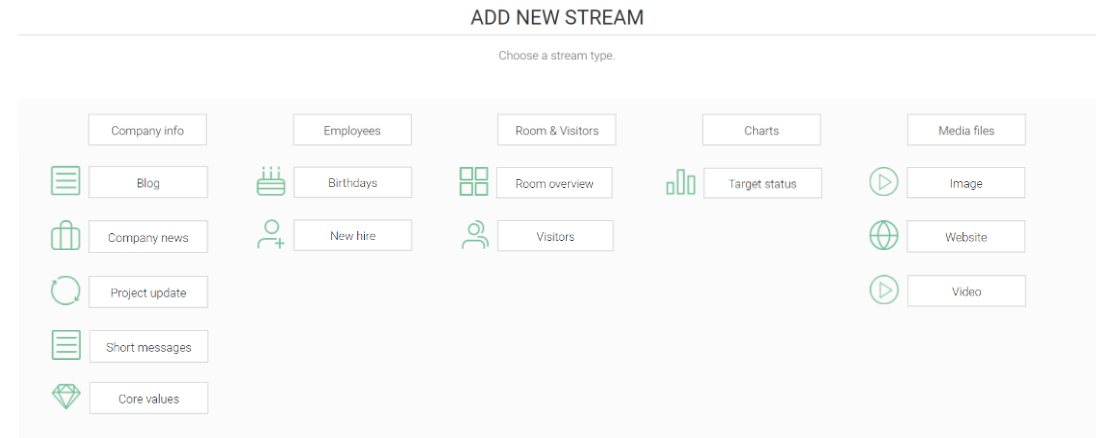

PLUG-IN

PREPARE

REACH OUT

# Keep everyone updated with the latest & most important info

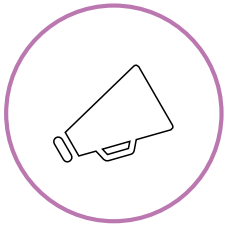

Drive employee engagement, boost the company culture and make your visitors feel welcome

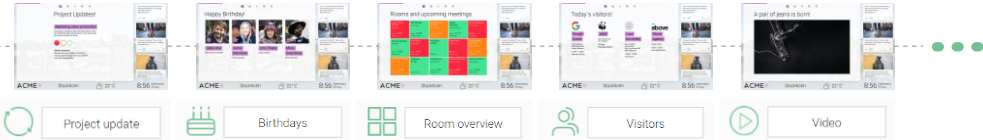

PLUG-IN

PREPARE

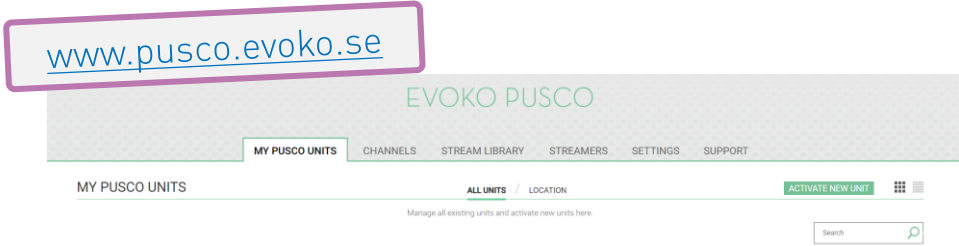

REACH OUT

# All updates are easily done in web-based Pusco Manager

Admin creates channels, decides which streams to include and which channel to display on each unit – streamers update content for the stream they have been assigned to update
